

WorldShip® 2016

Installation Guide

An easy guide to installing and upgrading WorldShip software.

Installation Guide WorldShip® 2016

WorldShip 2016 pre-installation checklist

1. Check Compatibility:

You may have integrated WorldShip with a UPS Ready® (or third-party) vendor application. Due to changes in the WorldShip database structure, these applications may not be compatible with WorldShip 2016.

Do not upgrade until you contact the UPS Ready (or other third-party) vendor.

2. Check Operating System and Service Pack:

The WorldShip 2016 upgrade requires that you have Microsoft® Windows® 7, Windows 8, 8.1 or Windows 10 to begin installation.

To identify which Operating System and Service Pack you have (non-Windows 8 systems):

- Click **Start** on the Windows taskbar, point to **Programs**, **Accessories** and **System Tools** and select **System Information**.
- The Operating System version and Service Pack will display in the System Information window.

Memory recommendations:

- **Windows 7 (1 GB - 32 bit and 2 GB - 64 bit)**
- **Windows 8, 8.1 (1 GB - 32 bit and 2 GB - 64 bit)**
- **Windows 10 (1 GB - 32 bit and 2 GB - 64 bit)**

CAUTION: Do not proceed if your system is not at the proper Operating System and Service Pack version.

3. Check for Administrative Rights:

Ensure that the user account used to log into Microsoft Windows operating systems has full PC administrative rights. If unsure, consult the computer technical support staff at your company. Due to security enhancements, Microsoft Windows 7/Windows 8, 8.1/Windows 10 users may be required to authenticate with administrative rights during the installation process. The User Account Control (UAC) prompt may appear several times during installation asking you for permission to let WorldShip install its components. You must acknowledge the UAC prompt and allow the installation to continue.

Also, if you need to access the WorldShip Support Utility for any reason, you must run this utility with administrative rights. To perform this task:

- On Microsoft Windows 7: Click **Start** on the Windows taskbar, point to **Programs** and **UPS**, right-click **WorldShip Support Utility** and select **Run as Administrator**.
 - On Windows 8, 8.1 and 10: In the **Start** window, right-click the **UPS WorldShip Support Utility** tile and select **Run as Administrator**.
- ### 4. Archive WorldShip Shipping History to improve performance and improve processing:
- Start WorldShip.
 - On the **Home** tab, select **History**.
 - On the **Home** tab, select **Archive/Restore** and then **Archive Shipments**.
 - In the Archive Shipments window, select **All Shipments**, or specify a date range, and then click **OK**.
 - In the Save As window, click **Save**.
 - Click **Yes** in the confirmation window.
***Note:** The last 14 days of history will not be deleted, and the history that is deleted may be restored when needed.*
 - Click **Done** when 100% is reached in the Archive Shipments window.
 - Click **Yes** in the window that appears requesting the database backup to be performed.
- ### 5. Check for anti-spyware, anti-malware and virus scanner software:
- Disable anti-spyware, anti-malware and virus scanner software that may conflict with the WorldShip installation.
- ### 6. Shut Down Open Applications:
- Shut down all other programs running on the taskbar, including Microsoft Outlook®, Internet Explorer®, Excel®, etc.

Installation Guide WorldShip® 2016

CAUTION: Microsoft Windows 7/Windows 8, 8.1/Windows 10 users please read below.

At the completion of the WorldShip installation process, your PC will be required to reboot. After reboot, Microsoft Windows 7/Windows 8, 8.1/Windows 10 may prevent automatic launching of the WorldShip application. Please launch WorldShip using the icon on your desktop should this happen. If you chose not to place the WorldShip icon on your desktop, you may launch WorldShip as follows:

- On Microsoft Windows 7: Click **Start** on the Windows taskbar, point to **Programs** and **UPS** and select **WorldShip**.
- On Windows 8: In the **Start** window, click the **UPS WorldShip** tile.
- On Windows 10: In the **Start** window, click **All Apps**, and then click the **UPS WorldShip** tile.

Upgrading

WorldShip 2016 may have different system requirements. A complete list can be found on the DVD packaging or at worldship.ups.com (U.S. only).

Note: WorldShip 2016 will only upgrade WorldShip 2014 (v17) and WorldShip 2015 (v18).

1. Complete the End of Day process prior to upgrading (if needed). Restart WorldShip once End of Day has completed.
2. Insert the WorldShip DVD into the drive.
 - If your Microsoft Windows 7 system has the auto-run feature turned on, installation begins automatically.
 - If your Microsoft Windows 7 system has the auto-run feature turned off, click **Start** on the taskbar and, in the **Search programs and files text box**, enter the letter of the DVD drive and the word *setup*, for example: *D:\SETUP*, and then press **Enter**.
 - If your Windows 8 and 8.1 system has the auto-run feature turned off, click the **Desktop** tile on the **Start** window, click the lower-right corner and then click **Search**, enter the letter of the DVD drive and the word *setup* in the *search box*, and then press **Enter**.
 - If your Windows 10 system has the auto-run feature turned off, enter the letter of the DVD drive and the word *setup* in the *search box* and press **Enter**.

3. On the WorldShip Setup screen, choose the following:
 - Application Language — Select the language in which you want WorldShip installed.
 - Install Location — This field is read-only.
 - Country/Territory of Installation — This field could be read-only.
 - When you are finished, click **Next**.
4. On the License Agreement screen, accept the UPS® Technology Agreement by selecting **I Accept the Terms in the License Agreement** and then click **Install**.
5. Wait while the installation process upgrades WorldShip. At the end of a successful installation, you will be prompted to reboot your computer. If your PC requires a password, you will need to log in and enter the password.
6. Remove the DVD from the drive.

Auto download upgrading

If a WebInstall package is downloaded, WorldShip prompts you to upgrade now or later. If you do not upgrade now, an Install button is added to the custom toolbar for your use later.

Note: WebInstall is available for all systems.

Installing

You can install WorldShip on a Single workstation or on a workstation that's part of a Workgroup. WorldShip should not be installed on a server.

Installing on a single workstation:

1. Insert the WorldShip DVD into the drive. If your system has the auto-run feature turned on, installation begins automatically.
2. On the WorldShip Setup screen, choose the following:
 - Application Language — Select the language in which you want WorldShip installed.
 - Install Location — **Optional:** Click **Options** and then select where you want WorldShip installed. WorldShip will create the folders \UPS\WSTD and place them under the two locations you choose.

Note: The Install Location cannot be a network, DVD, RAM, or virtual drive. While removable hard drives can be used, they are **not** recommended.

 - For Windows 7, 8 and 8.1 users who are upgrading, WorldShip displays the **Enable Microsoft® SQL Server® 2012 Express with WorldShip** check box. If you want to use Microsoft SQL Server 2012 Express with WorldShip, select the **Enable Microsoft SQL Server 2012 Express with WorldShip** check box and then click **OK**.

Note: Once you select the **Enable Microsoft SQL Server 2012 Express with WorldShip** check box and click **OK**, the check box is read-only.
 - Country/Territory of Installation — Select the country/territory where WorldShip is to be installed.
 - Select or clear the **Add Shortcut to UPS WorldShip on Desktop** check box as needed.
 - Select the **Finish Moving WorldShip Data** check box to restore a previously backed up WorldShip database.

Note: Only select this check box when moving an existing WorldShip system from one PC to another PC.
 - When you are finished, click **Next**.
3. If you selected the **Finish Moving WorldShip Data** check box, the Finish Moving WorldShip Data screen appears. Complete this window and click **Next**.
4. On the License Agreement screen, accept the UPS Technology Agreement by selecting **I Accept the Terms in the License Agreement** and then click **Next**.

5. On the Installation Type Selection screen, select **Single Workstation** and click **Install**.

Note: This screen does not appear if you selected the **Finish Moving WorldShip Data** check box.

6. Wait while the installation process copies the files. At the end of a successful installation, you will be prompted to reboot your computer. If your PC requires a password, you will need to log in and enter the password.
7. Remove the DVD from the drive.

Note: If you recently installed TCP/IP, Dial-Up Networking or a modem, you may see other windows or be asked for additional information.

Installing in a Workgroup configuration:

If you want to allow multiple shippers to process packages using the same database, then you may install WorldShip in a Workgroup configuration grouping. Installing WorldShip in a Workgroup configuration requires that a single Workgroup Administrative workstation be installed first. After the Workgroup Administrative workstation has been installed, one or many Workgroup Remote workstations may be installed to share the database that is located on the Workgroup Administrative workstation. WorldShip is designed to have the database reside on the Workgroup Administrative workstation. WorldShip is not designed to have the database shared on a network file server. Additionally, a Workgroup configuration grouping requires that a "shared network drive folder" be defined. The shared network drive is the location for files (other than the database) that will need to be accessed by all of the workstations in the Workgroup configuration grouping.

Note: You can configure the Task Scheduler in WorldShip to make daily backups of the database. Those backups could be stored on a server. For step-by-step instructions, select **WorldShip** on the **Support** tab and then **UPS WorldShip Help**; type Task Schedule Editor Procedures.

Pre-Installation Instructions: Create a folder in which to install the shared WorldShip files. This folder must be a shared Microsoft® folder and can reside on either the Workgroup Administrative workstation or on any drive that is accessible from the Workgroup Administrative workstation as well as the Workgroup Remote workstations. These files should be installed in a different folder than the local files.

Workgroup Administrative workstation:

1. Insert the WorldShip DVD into the drive. If your system has the auto-run feature turned on, installation begins automatically.
2. On the WorldShip Setup screen, choose the following:
 - Application Language — Select the language in which you want WorldShip installed.
 - Install Location — **Optional:** Click **Options** and then select where you want WorldShip installed. WorldShip will create the folders \UPS\WSTD and place them under the two locations you choose.
 - For Windows 7, 8 and 8.1 users, WorldShip displays the **Enable Microsoft SQL Server 2012 Express with WorldShip** check box. If you want to use Microsoft SQL Server 2012 Express with WorldShip, select the **Enable Microsoft SQL Server 2012 Express with WorldShip** check box and then click **OK**.

Note: Once you select the **Enable Microsoft SQL Server 2012 Express with WorldShip** check box and click **OK**, the check box is read-only.

 - Country/Territory of Installation — Select the country/territory where WorldShip is to be installed.
 - Select or clear the **Add Shortcut to WorldShip on Desktop** check box as needed.
 - When you are finished, click **Next**.
3. On the License Agreement screen, accept the UPS Technology Agreement by selecting **I Accept the Terms in the License Agreement** and then click **Next**.
4. On the Installation Type Selection screen, choose the following:
 - For the desired installation type, select **Workgroup Admin**.
 - For the location to install shared files by both the Admin and Remote, click **Browse (...)** and select the location in the **Workgroup Admin Shared Location** box.
 - When you are finished, click **Install**.
5. Wait while the installation process copies the files. At the end of a successful installation, you will be prompted to reboot your computer. If your PC requires a password, you will need to log in and enter the password.
6. Remove the DVD from the drive.

Workgroup Remote workstation(s):

By default, the Workgroup Remote workstation can perform limited functionality. The Workgroup Administrator can configure remotes to perform additional WorldShip functions.

Note: There are two methods of installing a Workgroup Remote workstation: installing from the DVD or installing from a shared drive.

Installing from the DVD:

1. Insert the WorldShip DVD into the drive. If your system has the auto-run feature turned on, installation begins automatically.
2. On the WorldShip Setup screen, choose the following:
 - Application Language — Select the language in which you want WorldShip installed.
 - Install Location — **Optional:** Click **Options** and then select where you want WorldShip installed. WorldShip will create the folders \UPS\WSTD and place them under the two locations you choose.
 - Country/Territory of Installation — Select the country/territory where WorldShip is to be installed.
 - Select or clear the **Add Shortcut to WorldShip on Desktop** check box as needed.
 - When you are finished, click **Next**.
3. On the License Agreement screen, accept the UPS Technology Agreement by selecting **I Accept the Terms in the License Agreement** and then click **Next**.
4. On the Installation Type Selection screen, choose the following:
 - For the desired installation type, select **Workgroup Remote**.
 - For the location to install shared files that were installed by the Admin, click **Browse (...)** and select the location in the **Workgroup Admin Shared Location** box.
 - When you are finished, click **Install**.
5. Wait while the installation process copies the files. At the end of a successful installation, you will be prompted to reboot your computer. If your PC requires a password, you will need to log in and enter the password.
6. Remove the DVD from the drive.

Installing from a shared drive:

You have the option of installing Workgroup Remote workstations from install files stored on the shared drive (the shared drive location was designated during the installation of the Workgroup Administrative workstation). The install files can be found in the \UPS\WSTD\Remote\Install\Disk1 subdirectory of the shared drive folder.

1. On the WorldShip Setup screen, choose the following:
 - Local Destination Directory — **Optional:** Click **Options** and then select where you want WorldShip installed. WorldShip will create the folders \UPS\WSTD and place them under the two locations you choose.
 - Workgroup Administrator Shared Location — This field is read-only and displays the shared location that was set up by the Workgroup Administrator.
 - Country/Territory of Installation — Select the country/territory where WorldShip is to be installed.
 - By default, a shortcut to **WorldShip** will be created on your desktop.
 - When you are finished, click **Next**.
2. On the License Agreement screen, accept the UPS Technology Agreement by selecting **I Accept the Terms in the License Agreement** and then click **Install**.
3. Wait while the installation process copies the files. At the end of a successful installation, you will be prompted to reboot your computer. If your PC requires a password, you will need to log in and enter the password.

For U.S. customers who want more detailed instructions, go to worldship.ups.com and click **View Support Guides** in the *Guides* section and then select **Install on a Single or Workgroup Workstation**.

Setting up communications

WorldShip requires electronic communications to transmit package and tracking information. If you do not currently have direct access or dial-up access to the Internet, the software provides access to UPS websites only.

Preparing for communications:

To prepare for communications, the following items must be installed on your computer:

- For Direct Access: TCP/IP.
- For Dial-up Access: TCP/IP, modem, dial-up adapter and dial-up networking.

Configuring communications:

When you start WorldShip for the first time, you will see the Communications Setup window. Select at least one connection method and provide any necessary information to complete the connection setup:

- Direct Access: a direct or broadband connection to the Internet that does not require dialing, such as Local Area Network (LAN), Wide Area Network (WAN), Digital Subscriber Line (DSL) or cable. Since Direct Access generally offers the fastest connection, UPS recommends this method.
- If you select Direct Access, you may need to identify the proxy server with the URL address, port and authorization information. If a proxy server is used, you must also use specific browser settings.
- Dial-up Access: a dial-up connection to the Internet through your existing Internet Service Provider (ISP). If you choose this option, select your existing ISP from the phone book list.

Reconfiguring communications:

1. On the **Tools** tab, select **More Tools** and then **Communications Setup**.
2. In the Communications Setup window, make the necessary changes and click **Next**.
3. Continue making changes as needed. Click **Finish** to save your new configuration.

Installation Guide WorldShip® 2016

You should reconfigure communications when any of the following situations occur:

- Direct access to the Internet becomes available.
- You see a message that one of your phone numbers is no longer valid.
- You change Dial-up Access or you change your modem.
- You change proxy server settings for Direct Access.
- You want to select a new phone number.
- You want to add or remove a connection method.

Registering with UPS®

Once the application is successfully installed, you must register with UPS in order to ship packages using WorldShip.

Before you begin the registration process, make sure a printer is connected to your computer and is operational.

1. After the WorldShip installation is complete and you have set up communications, the Register With UPS window appears. Enter the information about your company, where your system is installed and your UPS account number, and then click **Finish**.
2. If the Authenticate Your Invoice Information screen appears, complete the required information and click **Submit**.
3. WorldShip automatically connects to UPS and transmits your registration information. This may take three to five minutes. Please wait until the Shipping window appears.

Congratulations! You are now a WorldShip customer and are ready to process packages.

Post-installation checklist

1. If you disabled any anti-spyware, anti-malware or virus scanner software, please enable it.
2. If you receive a message that WorldShip cannot communicate with UPS, consult the computer technical support staff at your company.
3. For WorldShip Workgroup Administrative Workstations: Please be aware that the WorldShip database will be disconnected if your Workgroup Administrative workstation goes into sleep mode. You must close WorldShip on both the Workgroup Administrative and Remote workstations and relaunch the application to resolve this issue. If necessary, consult your computer technical support staff for questions about sleep mode and how to adjust this setting.
4. If you have a UPS-supplied printer, restart your printer prior to shipping by powering it off and then powering it back on. All printer drivers are pre-installed with WorldShip.

Uninstall instructions

If you uninstall WorldShip, do not delete any of its directories without first running the uninstall program.

- When running the uninstall program on Microsoft Windows 7, click **Start** on the Windows taskbar, point to **Programs** and **UPS**, and click **UPS WorldShip Uninstall**.
- When running the uninstall program on Windows 8, 8.1 and 10, right-click the **UPS WorldShip** tile and select **All Apps** in the **Start** window and then in the **Apps** window, under **UPS WorldShip**, select **UPS WorldShip Uninstall**.

Support guides

WorldShip provides a User Guide, Installation Guide and Shortcut and Navigation Guide in PDF format on ups.com®.

To view or print these documents, install the free Adobe® Reader® software from adobe.com and then follow these steps:

1. Go to ups.com/worldshipsupport.
2. Under Guides, select **View User Guides**.
3. View and print the documents as needed.
